

# VENTILATION

## integrity

### NATURAL DAY-TO-DAY LOUVRES

High Level Vertical day-to-day ventilators.

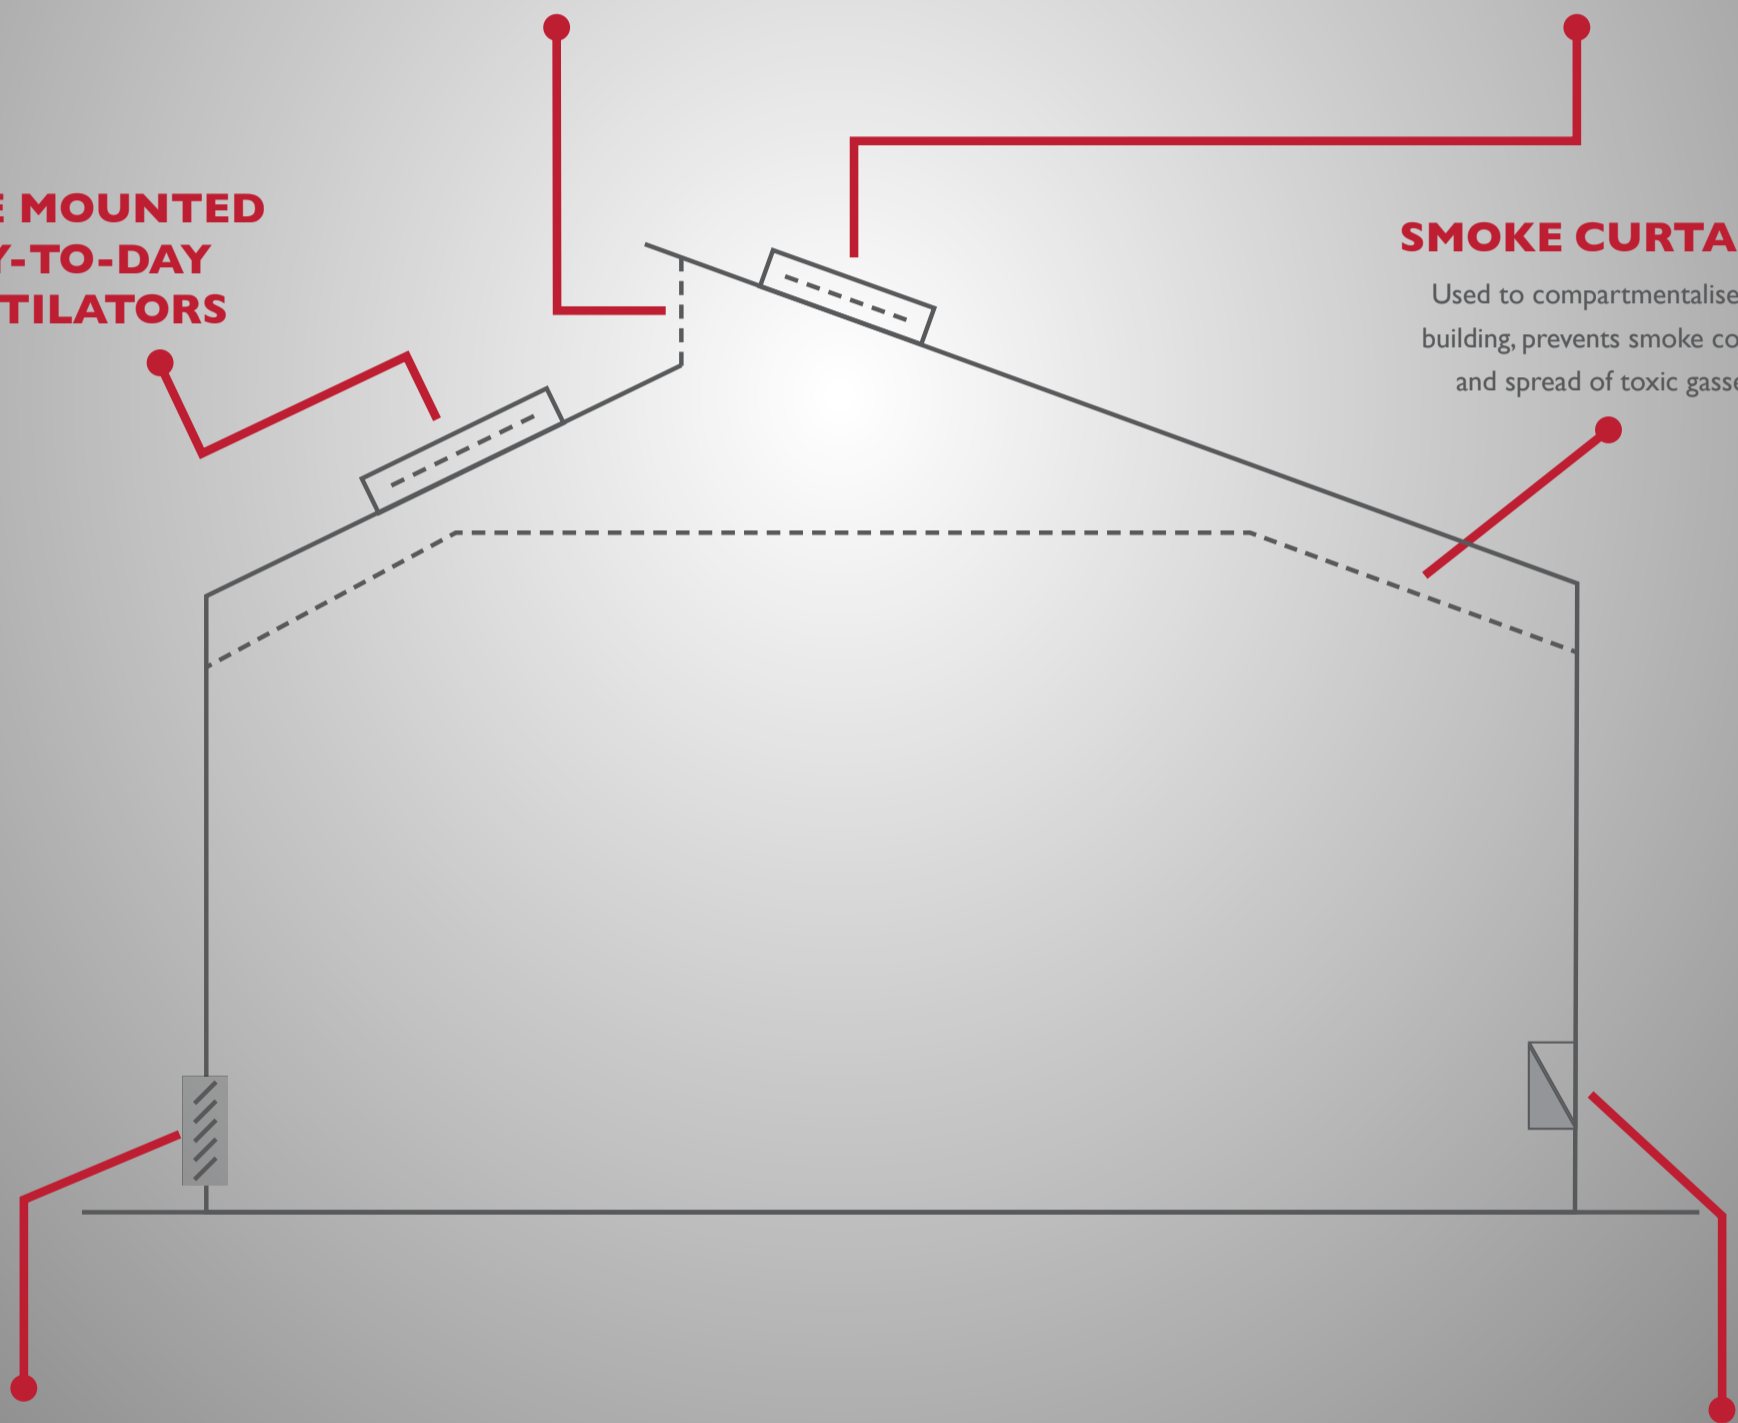

### SLOPE MOUNTED SMOKE EXHAUST VENTILATORS

Electronically operated to open at the interruption of a signal from a smoke detection panel.

### SLOPE MOUNTED DAY-TO-DAY VENTILATORS

### SMOKE CURTAINS

Used to compartmentalise the building, prevents smoke cooling and spread of toxic gasses.

### FRESH AIR INLET LOUVRES

Ensures fresh air to the fire. Keeps the smoke hot and buoyant, a critical component for smoke ventilation.

### LOW LEVEL CONTROL PANELS

Easy access for maintenance and regular testing.

#### Precision Smoke and Heat Exhaust Ventilation Systems.

With products of the highest quality and safety standards, the Smoke Ventilation division of RVI is well-positioned to improve existing natural or powered systems and provide new solutions to smoke control problems. All RVI smoke and heat exhaust ventilation products are rigorously tested and certified by an independent test laboratory, according to **EN 12101** standards and comply with the latest South African Building Standards **SANS 10400-T**.
