

# WAREMA climatronic® 3.0

Information at a glance

*Der SonnenLichtManager*

## System components

- 1 WAREMA climatronic® 3.0 control panel
- 2 WAREMA climatronic® WebControl
- 3 WAREMA climatronic® switch actuator for electrical distribution installation
- 4 EWFS Hand-held transmitter

## ► The benefits for you

- Sun position-dependent slat tracking allows for the best possible light yield and prevents direct glare
- Switching and dimming of light is possible
- Up to 16 scenes can be set
- Settings through free software/control panel:
  - Can be conveniently changed at any time
  - Can be saved on and loaded from an SD card
  - Rewiring avoided when user requirements change
- Using the control panel as KNX central control unit via KNX Gateway
- Control via Android app, iOS app or via web browser

## ► Features

- Channels can be operated via EWFS transmitter and app
- Control panel with control wheel, sensor buttons, glass front and 5.7" TFT colour display
- Up to 7200 single products are controlled on 64 channels in single or group switching
- Sensors for inside temperature and humidity are already integrated into the control panel
- Control functions:
  - Brightness
  - Dawn/dusk
  - Wind speed
  - Wind direction
  - Precipitation
  - Time
  - Outside temperature
  - Inside temperature/humidity
- Fields of application: multi-family/single family house, new office building, renovation
