

SHADING PERFECTION

The Architectural Solutions division of RVI supplies bespoke aesthetic thermal and light control façade solutions, which directly impacts on the energy requirements of a building. RVI boasts the in-house ability to design and engineer, as well as install and commission application-specific custom solar shading systems for any building application or process.

Challenged by the scale of the Discovery Head Office project as well as the tight construction program RVI had to call on their specialist design and manufacturing partner and all their installation expertise to deliver the installation of 2896 fully motorised blinds to date. Once completed Phase 1 and Phase 2 of the prestigious development will be equipped with 4300 blinds, all controlled via an intelligent Climatronic sun tracking control system.

Other prestigious projects include:

Sasol Head Office, Sandton
90 Grayston Drive, Sandton
Webber Wentzel Head Office, Sandton
Old Mutual Head Office, Sandton

Standard Bank Head Office, Rosebank
Total Head Office, Rosebank
PwC Head Office, Midrand
Exxaro Head Office, Pretoria
